# Orientation and Purpose of the Work Groups

---

- You have now registered to participate in an experimental Organisational working group (ORGW) as described in the DP WG's chair's Gérald Ouzounian's presentation.
- The general idea of each work group is to make the first experiment experiment to carry out one of the Deployment Plan's joint activities – in total four ORWG or two potential TSWGs activities today.
- We are looking besides the vision and strategy of each work group for your interest to continue this activity.

# Work Groups

---

**WG1 Organising Peer Reviews**, chair: Juhani Vira  
**Room: Hallintohuone**

**WG2 Establishing an Environmental Reference State**, chair: Patrick Landais  
**Room: Galleria**

**WG3 CMET WG**  
chair: Marjatta Palmu  
**Room: Cafeteria corner**

**WG4 Interfaces (IWG)**,  
chair: Philippe Lalieux  
**Room: Juhlasali**

**WG5 Setting IEPs**  
chair: Gérald Ouzounian  
**Room: Tiedekuntasali**

**WG6 Safety Case Benchmarking**  
chair: Wernt Brewitz  
**Room: Musiikkisali**

# Content of the Work Groups

---

- Review the DP WG's presentation
- Overview of the Topic at hand by the WG chair
  - Background materials (when applicable); the DP template on the Topic
- Joint discussion first on the what would be the participants' vision(s) **on this work group's Topic**. This is followed with with a common vision for the Topic by the work group (summarized by the chair)
  - please remember nothing can be attached to the walls or other permanent structures in the rooms
- Developing the strategy for meeting this common Topic vision
  - alternative strategies possible, but need to have support from the other WG participants
  - summary on the development of strategy options
- Interested participants and the way forward

# Your tasks

- Your Topic vision on the work group question?
- Come up with a common Topic vision
- How to get to the Topic vision?  
Alternative routes/strategies
- Your common alternatives for the strategies

# Your commitment and interest to continue this work

---

- Each of you have already demonstrated interest in the Topic by signing for the work group
- After the discussion, those interested in pursuing the Topic further should let your chair know about it.
- One outcome of the work is a list of interested organisations and contact persons to pursue the topic further (to deploy!)

# Implementing Geological Disposal of Radioactive Waste

Technology Platform

Vision document

## OUR SHARED VISION

*Our vision is that by 2025, the first geological disposal facilities for spent fuel, high-level waste, and other long-lived radioactive waste will be operating safely in Europe.*

Repository  
operating  
by 2025
