

SAFETY CASE PEER REVIEWS

EF Work Group 1

**Avolahti, Kienzler, Pescatore, Slovak,
Smart, Steininger, Vira (chair)**

**WG1, IGD-TP Exchange
Forum 2, 29.11.2011 Helsinki**

Vision

- Efficient framework for Implementing Organisations' QA-related peer reviews of scientific and technical RTD reports supporting the Safety Case

Implementation

- Survey of current review practices
- Description of best practices
- Pool of experts available for review activities
- Scientific/technical forums for learned discussion
- Initiation of review workshops

Survey of current practices

- current requirements
 - scope of review activities
- protocols, procedures, instructions
- TOR practices
- language of reporting
- documentation of reviews
- openness policies
- involvement of learned societies
- use of review teams
- independence requirements
 - paid reviews
- resolution of disputes/disagreement
 - need for consensus?

WG1, IGD-TP Exchange
Forum 2, 29.11.2011 Helsinki

Pool of review experts

- Password protected data base of available experts
 - CV's
 - Secretariat maintenance
 - prior validation
- WMO's own capacities for reviewing other WMO's work
- Cooperation with universities
- Cooperation with NEA/IGSC
- Links to education and training area

Best practices

- based on the survey of current practices
