

Our acknowledgement :

- ✚ The more the project gets into detail operations of construction and exploitation of the disposal, the more the key issues to deal with concern complex processes and/or demand high-level digital simulations.
- ✚ Beyond the respect for the regulations all the stakeholders are avid to have second opinions on these non-trivial subjects, what shows that the need for scientifically well suited evaluation bodies (in France CNE, IRSN).

A common understanding implies similar experience feedback.
