CROCK 1st WORKSHOP OF THE COLLABORATIVE PROJECT CROCK

Objectives
The CROCK Project is established with the overall objective to develop a methodology for decreasing the uncertainty in the long-term prediction of the radionuclide migration in the crystalline rock far-field.
1st Workshop objectives:
The main focus of the Workshop is the presentation and discussion of scientific and technical project results. Additionally, the project participants will have the opportunity to discuss administrative and future implementation issues.

General Information
Location:
The 1st Workshop of the CP CROCK will be held in Stockholm (Sweden), from 22nd to 24th May 2012, at the SKB Head Office (www.skb.se).
Organisation and outcome:
Plenary sessions will be used for communicating results from the different Workpackages. After the meeting the scientific outcome will be published through workshop proceedings as KIT report.
In association with the workshop, a Topical Session including specific talks on "Reactive transport modeling" will be held.
The project workshop is open to external participants who are highly welcome.
